Oslo Internet Exchange

Oslo Internet Exchange (OS-IX)

- Opening a Carrier Hotel in October 2017
- Dedicated Network Exchange with Metro – National – Regional – Interregional – International operators
- Public Internet Exchange (IXP) and Private Interconnect (PI) facility
- Portal based automated provisioning service
- Virtual Point of Presence (VPOP) in N01 Campus for extended cross connect (public and private)

NO1 CAMPUS

CLEANING UP THE CLOUD

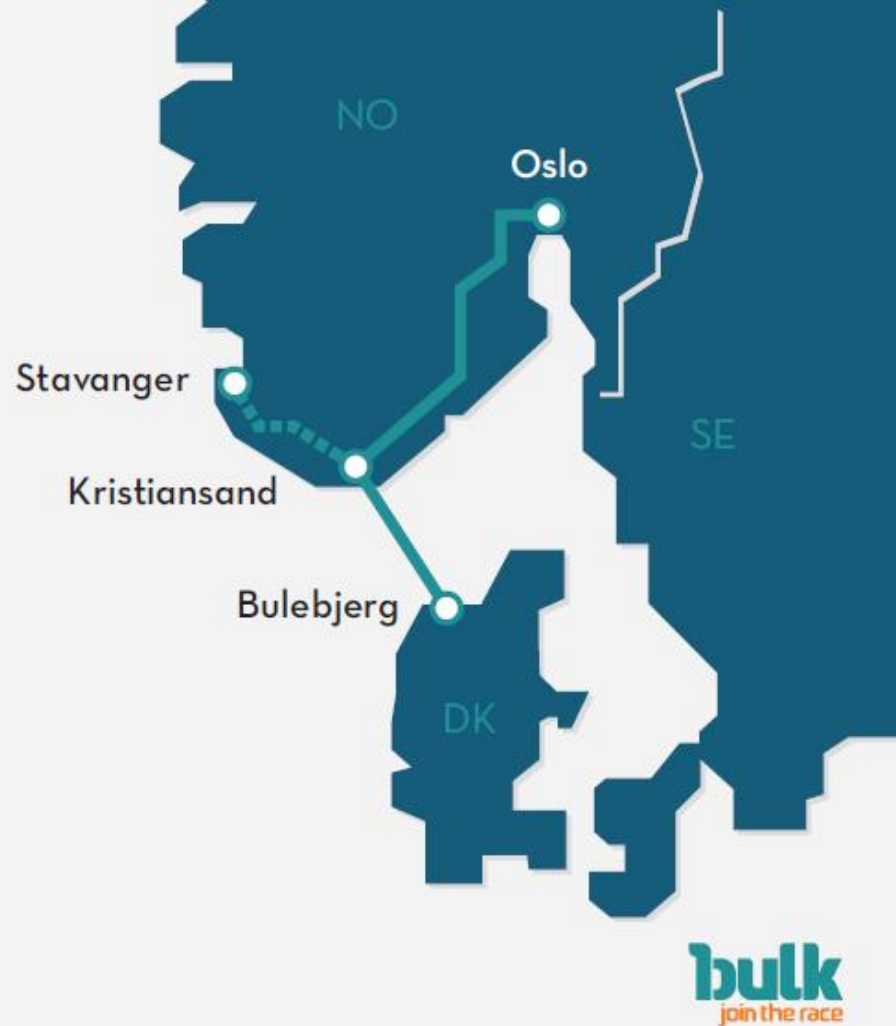

bulk
join the race

N01 Campus

- 100 MW dual power availability
- Opening a 2.5 MW data center module 2017
- Dedicated Network Exchange with Metro – National – Regional – Interregional – International operators
- Public Internet Exchange (IXP) and Private Interconnect (PI) facility
- Portal based automated provisioning service
- Virtual Point of Presence (VPOP) for extended cross connect to major European IXPs
- Cable Landing Stations (CLS) for international Subsea cables

BULK NETWORKS

Bulk Network connectivity

✓ Phase 1 – Multiple dark fiber in Norway

✓ Phase 2 – Subsea cable Denmark

Phase 3 – Capacity to major European IXPs

Phase 4 – Co-building multiple subsea cable networks

Phase 5 – expanding dark fiber in Norway

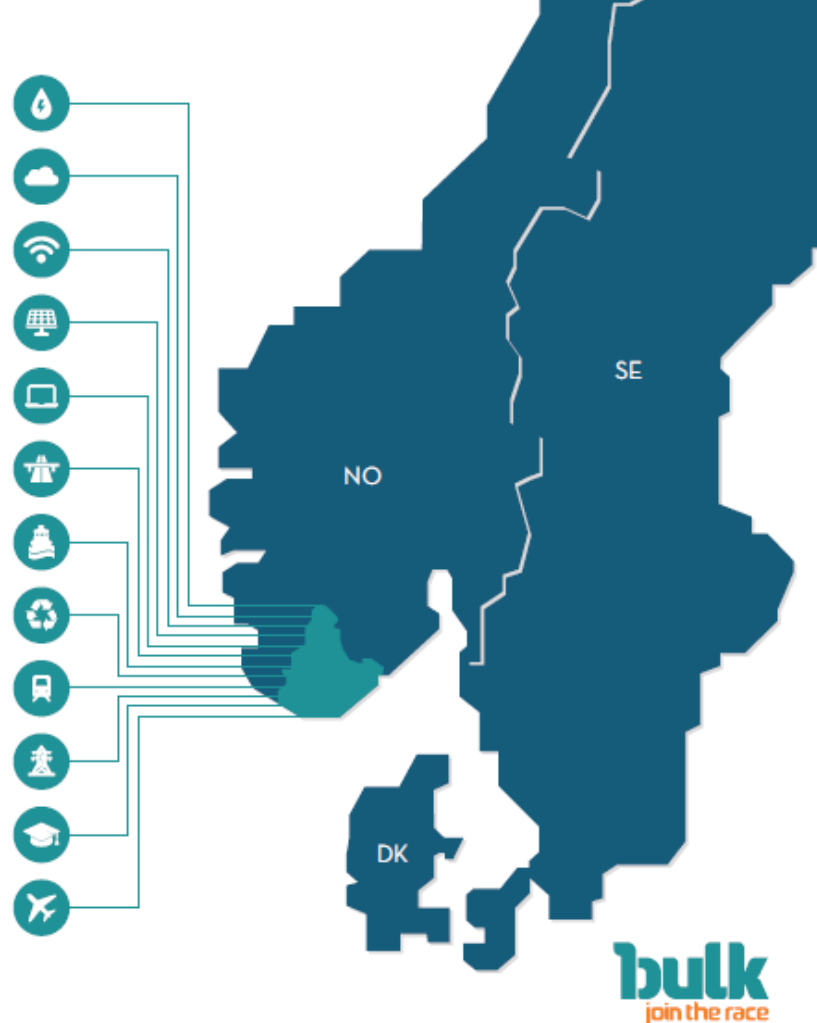

ELECTRIC CITY AGDER

Why Electric City Agder?

Agder satisfies all requirements for establishing a data center:

- Renewable energy
- Surplus of hydroelectric energy
- Cool and stable climate
- Easy access to important infrastructure like ports, railways, international airports, roads
- University
- Predictable political framework
- Low electricity spot price
